*"When I clock into work, I leave my personal life at the time clock
and assume my job duties for the remainder of my shift."*

September 2015

Hello,

My goal as an employee is to assist in any way possible to the success of a project. I thrive in my own environment and feel most comfortable when in my own space to execute my job duties.

I love to program, think about solutions to implement in the brainstorming process, I like to work from home and I love to see the magic that happens inside a computer after the program is ready to execute.

I have a logical mentality and a willingness to learn and open up to new routines, styles and personalities.

I am seeking employment to bring my skills to your team, to further my career and to expand my experience in different fields.

Please accept my resume for your consideration.

Sincerely,

Sergio Samayoa
