Portfolio: ZenCodeMaster.com
Resume: bitbucket.org/wowiamhere/coding-resume

Hello **Team:**

I am a coder familiar with different technologies and languages.
I can design, develop, test, and deploy new features, improvements and upgrades, etc

I like to take on **frontend or backend** work.

My portfolio **ZenCodeMaster.com** is coded in:
ExpressJs, **Angular2**, **Rxjs**, **Postgresql**
with *frontend/backend* projects ranging from
Rails, ExpressJs, **Angular2**, **Ruby**,
html, **css**, **javascript**, **Typescript**, **Node**, **OOP**, **MVC**, **HTTP**, **APIs,** etc …

I have worked with **Rails, Rspec/Capybara, Postgres**, etc
Code Samples: bitbucket.org/wowiamhere/codesamples
Just finished a sample message board (3 models, associations, devise, rspec, etc)
Heroku: railsmessageboard.herokuapp.com
Repo: github.com/wowiamhere/RailsMessageBoard

I have worked with some **.NET** and **Visual Studio**, but do not have formal/full projects.

I like to use/learn/try/play with different technologies.
I learn a lot through actually coding and going through the documentations.

All projects are responsive.

I am seeking a team to join.
I have a **logical mentality** and a **willingness to learn** and
open up to new routines, styles.

Please accept my resume for your consideration.

Thank you

sergio
