"Whadda you mean it doesn't run!!!!!"

February 2016

Hello,

My goal as an employee is to assist in any way possible to the success of a project. I thrive in my own environment and feel most comfortable when in my own space to execute my job duties.

My personal goal is to develop software remotely.
Current projects:
*Web Blog (website)
    -bitbucket.org/wowiamhere/latestfashiontrendzblog
        -login: 'example@trendzblog.com'
        -pass: 'password'
        (checkout AngularJs on Profile page
        and all over pages for commenting)
    -Ruby On Rails 4.2
        +3 models (2 associations: has_many, belongs_to)
        +friendly forwarding, remember-me option, etc.
        +partials for comments, posts, user information
        +infinite scrolling
    -PostgreSql
    -AngularJs
        +$routeProvider
        +$http
        +$resource
        +$location
        +controllers, directives, services, templates etc
    -HTML, CSS, jQuery
 *Game Development
    -C++/SFML
        +tetris
*Currently learning
    -ASP.NET 5 (MVC 6)
    -AngularJs 2

All my life, I have loved to watch what happens inside this machine when I type in an editor the syntax of the language being used, compile it and run it.

I love to program, think about solutions to implement in the brainstorming process, and I like to work from home.

I have a logical mentality and a willingness to learn and open up to new routines, styles and personalities.

I am seeking employment to bring my skills to your team, to further my career and to expand my experience in different fields.

Please accept my resume for your consideration.

Sincerely,
Sergio S.
